A curling iron which fits in your palm and makes your curls pop is an absolute beauty, and an expensive beauty as well. But if that's not something you're willing to spend on a beauty essential, then let's look at some other options. Before you choose, let's make sure you know some of the most essential characteristics of the curling iron. [By: Kimi] Let's start with the base - how does it work? You'll have to start by heating up the iron before you're ready to curl. The most common method of heating is through heating from the hand, or you can also use an external source. [By: Kimi]
