Part of the AutoCAD package is the ObjectARX (Object-Oriented ARX), or ARAX, application programming interface, which allows third-party developers to use AutoCAD as a development platform. The other APIs are not fully compatible with each other. ObjectARX is considered the first and only native release of AutoCAD ObjectARX (AraX). AutoLISP AutoLISP is an object-oriented variant of the AutoCAD LISP language, which allows programmers to build applications for AutoCAD. AutoLISP applications can be run as stand-alone applications or used as an add-on to AutoCAD, and can be used to create different types of plug-ins. AutoLISP is available as a free download for Windows. Visual LISP Visual LISP is a programming language for developing AutoCAD plugins. Developing in Visual LISP requires editing and compiling a.lsp file, with each line of code, called a Line Statement, containing a list of either Visual LISP commands or functions. Each line is executed in turn as it is read. The following code is an example of what may be included in a.lsp file: line([1,4,4], 2) line([0,2,2], 5, line) curve([1,2,1], [2,3,2], [3,4,3]) While Visual LISP is a

general purpose development language, the Open Visual LISP project was released in September 2010 to address some limitations of the original. The Visual LISP Language Reference describes the various language constructs, including Line Statements and Labels. VBA AutoCAD VBA (Visual Basic for Applications) is the Visual Basic scripting language for AutoCAD that was introduced in AutoCAD 2000 and was in Beta form for AutoCAD 2002. The language was renamed to VBA for AutoCAD in AutoCAD 2003. VBA is also part of the AutoCAD Essentials for Dummies book for introduction to the general VBA language. VBA can be used to automate tasks, control the user interface, insert commands, and change some aspects of the user interface. VBA commands and the types of users it is commonly used by are described in the Visual Basic a1d647c40b

This is an updated version of a story originally published at 10:40 p.m. on June 17. RACINE — The shutdown of two large manufacturing plants in Racine County, the loss of 136 jobs at a little-noticed company in Kenosha and about 130 jobs at others in other parts of Wisconsin in February have made the news. A shakeup of about 350 jobs at four plants in the Great Lakes Region of Wisconsin has not. It's the reason layoffs are buried in the news. The loss of about 50 jobs by a company that has used the same name since the 1960s would have been covered in the news under any circumstances. Even with the loss of jobs, the Redmon Paper Co. is expected to remain in business. The company is preparing to move into the final phase of an expansion project that will put it up against some of the larger companies in its industry. About 400 jobs were on the chopping block at Redmon Paper. As in many other cases, those cuts were made to reduce costs and keep the company profitable. With the expansion, profits should increase. The company
