KeyMacro is a small utility designed to quickly record your keyboard or mouse actions. It has been designed to record all the actions you do on your computer, and makes it possible to replay them in slow motion. You can easily save your actions in all the most frequently used files for later use, with the help of a simple interface. The application also supports multiple recording, so you can record not only a single key or a mouse click, but also several keys or mouse clicks at the same time. This makes it possible to easily record applications that are launched during the execution of another, to also speed up the application launch process. Furthermore, KeyMacro supports all the most used Windows and Mac shortcuts, which makes it possible to record even the most complex keyboard or mouse actions, such as copy, cut, paste or formatting data. Finally, KeyMacro also supports hot keys. It's as easy as press the keyboard combination Ctrl + Alt + P, then KeyMacro will record all the actions performed on the system. KeyMacro provides the possibility to stop or pause the recording process, and to execute a replay of all the actions recorded so far. This makes it possible to create complex macros, which are designed to perform a series of actions. As a result, KeyMacro provides the possibility to easily record applications launched on your computer, to copy and paste data, to format files and data, to copy, cut and paste and to quickly launch all the applications of the Start menu, using hot keys. KeyMacro is designed to record key or mouse actions, but it can also be used to quickly speed up the launch of an application using hot keys. KeyMacro allows the following actions to be recorded: • Mouse clicks and moves • All Windows shortcuts • Copying, pasting and formatting files and data • Launching an application • Fast start of an application by pressing the corresponding hot keys • Finding the default window of an application • Copying, pasting and formatting the default window of an application • Launching a file using a hot key • Duplicating any file and folder • Fast start of any file or folder • Opening a folder using a hot key • Printing a file • Copying, pasting and formatting an image • Opening an image file • Printing an image • Combining operations to speed up complex actions • Removing or moving an item of the Windows Start menu • Repl 77a5ca646e
