In November 2005, Autodesk introduced a significant redesign of AutoCAD Activation Code 2009, its first major redesign since the original release of AutoCAD in December 1982. Major changes to the application's user interface and product strategy in response to the release of AutoCAD Architecture 2009. The initial release was followed by a set of patches that corrected some of the most common issues with the upgrade. Among these were upgrades to the feature set and templates as well as major changes to the end user interface. The 2009 release of AutoCAD (then AutoCAD 2009) was developed and marketed by Autodesk as a service model that enabled business users to release out-of-the-box or pre-configured services, software, and templates that would solve their common day-to-day design and drafting tasks. The release included many new features and enhancements such as: Integration of DraftSight as part of the AutoCAD suite for drafting users. Autodesk released AutoCAD Architecture 2009 in November 2005, and the initial release of AutoCAD Architecture 2009 was AutoCAD 2009. That initial release of AutoCAD 2009 had several critical problems that required post-release patches to correct, including incompatible Microsoft.NET applications that did not support the .NET 2.0 framework. The problem has since been fixed in a series of patches, with the latest released in 2013. .NET applications that did not support the .NET 2.0 framework.
