Contact mujahid.1. Field of the Invention The present invention relates to a recording apparatus for recording image information on a label recording medium. 2. Description of the Related Art In recent years, a label printer has been known which records an image on a label to be attached to the surface of an envelope so that a recipient can read the image in the envelope. Generally, in the label printer, image information is read from a memory so that a label is directly printed on the basis of the image information or image information stored in the memory is converted into dot data so that a printer head of the label printer prints the dot data to the label. In such a label printer, there is a risk of mixing up of the images to be printed on the labels so that the labels having the images mixed up are attached to the envelopes. For this reason, it is necessary to confirm the state of the images to be printed on the labels by visually checking the labels attached to the envelopes. The visual checking of the labels is carried out by attaching them to an envelope and transferring the attached labels to a reading apparatus for visual checking. In the case of this label printer, however, two types of labels should be prepared in addition to the labels on which the images to be read are printed. That is, one type of label should be used to record the image information on the label and the other type of label should be used to record the images to be visually checked. In this case, the two types of labels must be prepared and conveyed to the reading apparatus to be attached to the envelopes one by one. For this reason, the workability of the label printer is greatly impaired. Death Changes Everything Death Changes Everything is a Death metal/deathcore band formed in Moscow, Russia in 2009. Since their beginnings they have released two full length albums and several EPs. They have played live across Russia, Europe, and the United States
